

X-Visual Technologies GmbH Listed Among Top Finalists for the 2011 Microsoft Visio Partner of the Year Award

1/1

BERLIN, Germany — June 24, 2011— Today, X-Visual Technologies GmbH announced it has been selected as a finalist for the Microsoft Visio Partner of the Year Award.

Awards were presented in multiple categories, with winners chosen from a set of more than 3,000 entrants worldwide. The Visio Partner of the Year Award honors partners with proven expertise in the planning, implementation, and management of solutions using Microsoft Visio as a platform. This award recognizes X-Visual Technologies GmbH as successful in demonstrating how the Visio solution scenarios (business intelligence, process management, IT management, facilities management, and quality/compliance) helped customers reduce costs, gain business insights, enhance compliance, and reduce IT risks.

“We are proud to recognize this outstanding group from our highly valued worldwide partner network as our 2011 Partner Award finalists,” said Jon Roskill, corporate vice president, Worldwide Partner Group, Microsoft Corp. “We applaud the unique perspective and creativity each of these companies brings to solving customer business and technology challenges. Our strong partnership along with their commitment to customers plays an essential role in our mutual, long-term success.”

Company profile

X-Visual Technologies combines engineering competence and Visio know-how in a high-quality application for engineering, installation and documentation in the construction of process plants. Since 2004 the company has been located in the economic and science center Berlin Adlershof, the most modern science and technology park in Europe. X-Visual software Visual PlantEngineer based on Microsoft Visio makes it possible to create complex piping & instrumentation diagrams (P&IDs) satisfying ISO 10628 and to manage projects with very large amounts of data both clearly and optimally. Company-specific reports in Excel and technical documentation in Word can be generate automatically and multilingually. The intuitive Microsoft Office user interface ensures user-friendly operation, with no knowledge of CAD required. The customers include facility planners, builders and operators in the water treatment, pharmaceutical and chemical, automotive and environmental industries, as well as in other branches of process engineering. The P&ID software is used by engineers and technicians, in the technical drawing department, and by sales representatives.

The Microsoft Partner Awards recognize Microsoft partners that have developed and delivered exceptional Microsoft-based solutions over the past year.
